Thank you! And enjoy Seattle. I hope it's sunny.

Governor,

I will definately contact Chuck when I get back to town next week. I will be in Seattle the rest of this week meeting with EPA and my counterparts from the NW states and western provinces.

I look forward to working with you and the other cabinet members on Climate Change issues and opportunities. I appreciate this is just one of many diverse matters on your big plate! You are doing a great job keeping it all moving forward.

Larry

Subject: Climate Change

Hi Larry:

My brother, Chuck Heath, is one of the school teachers participating in the Climate Change study program (for science teachers) at UAF this summer. He'd like to talk to you about

his ideas for a task force - I explained you have the sub-committee already studying the issue, but maybe there are ideas from what he and his fellow teachers are learning that could be incorporated into our sub-committee's mission.

Chuck's request comes on the heels of some great ideas that Tom and Marty shared with me re: Alaska really getting serious about dealing with climate change impacts.

If you want to contact Chuck, his email address is chckheath@yahoo.com. His emails on this matter are attached below. If it's more convenient, I could give him your email address?

I'm getting more and more enthused about digging into the subject and working on it - especially after hearing from Tom and Marty on ideas they believe the state could be considering. Thanks for your patience with me along the way!

Yes. I've already talked with a senior scientist here who's putting a list together today.

How did Todd do fishing?
